SECOND SUPPLEMENTAL INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

Sir:

Herr Jürgen Stiel, house patent counsel for the assignee of the subject application, received an e-mail from CONTIWEB on July 30, 2010. The e-mail submitted 17 pages of material to Koenig & Bauer. These materials are asserted as being evidence of the sale by CONTIWEB to MAN Roland of a reelchanger with an automatic transport device. The e-mail further asserted that the material sold to MAN Roland by CONTIWEB was for MAN Roland's customer, R. R. Donnelly.

The 17 pages of material are enclosed. The undersigned has numbered these pages, each in the top right corner, with an encircled page number. These materials, which are all in German, were characterized by Herr Stiel, as follows:

Page 1 is an invoice for the reelchanger;

Page 2 is a bank guarantee;

Pages 3 and 4 are a confirmation of the order;

Pages 5-9 are the specifications of the reelchanger;

Page 10 indicates a reel delivery with 3 waiting positions;

Page 11 is a guarantee and other requirements;

Page 12 is an order confirmation;

Pages 13-17 are transporting papers.

It is to be noted that the above page 13 is a duplicate of the bill of lading, dated February 4, 2004, and submitted to the Patent Office with the Supplemental Information Disclosure Statement filed July 6, 2010.

As with the materials filed on July 6, 2010, the submission of these materials to the Patent Office is not to be construed as an admission that they are prior art. There is no evidence of a sale or of a public use, in this country of these materials more than one year prior to the effective U.S. filing date of February 9, 2005, of the subject U.S. application. As was the case with the other materials, these materials evidence a sale between CONTIWEB and MAN Roland for materials to be delivered to R. R. Donnelly in Dwight, Illinois. Since the bill of lading is dated February 4, 2004, and since it is believed to evidence the delivery of materials from CONTIWEB to SEEPACK at the German port of Bremen, and further since those materials had a weight of at least 18,000 kg, it would have been impossible for those materials, whatever they were, to be transported from Bremen, Germany, to Dwight, Illinois, and put into operation by February 9, 2004. They thus do not constitute prior art under 35 U.S.C. 102(b).

These materials are being submitted in accordance with conservative practice.  
Their entry into the file of the subject application is respectfully requested.

Respectfully Submitted,

Erwin Paul Josef LEHRIEDER et al.
